1. The following is an examiner's statement of reasons for allowance: The Hormai reference (cited in this action) is the closest reference and has a metallic reflective layer applied to the format/servo features. There is no motivation to modify this to reduce the reflectivity from 100% and further as the direction of the incidence of the laser has an effect on the reflectivity observed, (ie incident upon the antireflection layer after passing through the second substrate vs. directly upon the antireflection layer) there is no motivation to make the both layers antireflection films and further no motivation to make them different.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
